

FIRE EXTINGUISHERS (VEHICLE/EQUIPMENT)

AREAS OF CONCERN

Fire extinguishers pose a risk to health and safety when discharging. The Pollution Prevention Operations Center (PPOC) has implemented a program for exchange of vehicle/equipment fire extinguishers (separate from building extinguishers). Do not remove building fire extinguishers and use for equipment such as your FARP or other training missions. Check the TM/FM for appropriate size/type Fire Extinguisher.

CHARACTERIZATION

Vehicle/equipment fire extinguishers may contain residue that could be an irritant.

HANDLING PROCEDURES

DO NOT DRILL HOLES, REMOVE HEADS, OR DISCHARGE THE FIRE EXTINGUISHERS

Step 1 Bring unserviceable or excess vehicle/equipment/Halon fire extinguishers to the **PPOC Fire Extinguishers** at Bldg 5209, Desert Storm and Oregon Ave for disposal between 0700 and 1500. (Do Not discharge or empty).

Step 2 If the PPOC has a serviceable fire extinguisher in stock, you may pick up one in exchange. DA 1687 Signature Card is required for pick up.

Step 3 If no fire extinguishers are in stock, you may receive one within 7 – 14 working days.

NOTE: Units will be charged the service fee on the monthly hazmat issue report.

PPOC Fire Extinguishers does not service MRAP Fire Extinguishers. Coordinate with Unit Maintenance Officer first and they will contact Division G4 Maintenance for replacement.

GENERAL INFORMATION

For additional information on types and availability of building fire extinguishers contact the **Ft. Campbell Fire Department Station 3**. For additional information on vehicle fire extinguishers, and DOT transportation requirements, contact **PPOC Support**.
